DETAILED ACTION

Allowable Subject Matter

1. Claims 11-15 allowed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 and 16-20 rejected under 35 U.S.C. 103(a) as being unpatentable over McDevitt et al. (2002/0045272) in view of Kuroda et al. (2003/0132392).

Regarding Claims 1-10 and 16-20, McDevitt discloses method and apparatus for the delivery of samples to a chemical sensor array where in Fig. 73, it is disclosed a hydrophobic segment/contact 1032 and a sensing layer 1030 disposed below the hydrophobic segment/contact 1032 where the sensing layer 1030 is exposed to the medium in an area below the segment/contact. McDevitt et al. fail to disclose the perforation/hole/opening structure. However, Kuroda et al. disclose a chemical sensor where in Figs. 1, 2b and 7 and paragraph 10, the required perforations/openings/holes are disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required perforations/openings/holes in McDevitt

et al. taught by Kuroda et al. in order to have a higher accuracy semiconductor device to be used in sensor applications.
